

### REMARKS

Applicant is hereby withdrawing the Appeal to address points specifically raised by the Examiner in the Examiner's Answer. Although Applicant submits that the claims, as previously written are patentable in view of Noro, for purposes of expediting prosecution, independent claims 29 and 39 have been amended to recite that the set up command(s) are separate from the action command. Thus, for at least the reason that Noro fails to teach or suggest set up commands and action commands that are separate from each other, as now explicitly recited in independent claims 29 and 35, these claims overcome the §102 rejections. Furthermore, independent claims 29 and 35 have been amended to recite that the transmission of all of the accumulated commands to the imaging device is halted until a determination is made that one of the commands is the action command. Thus, Applicant submits that claims 29 and 35 now explicitly recite the time ordering of the accumulation and triggering. Therefore, Applicant requests allowance of claims 29-48. Newly-added claims 53-56 are patentable for at least the same reasons.

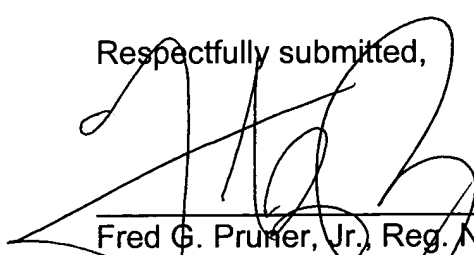

The Commissioner is authorized to charge any additional fees or credit any overpayment to Deposit Account No. 20-1504 (ITL.0071US).

Date: February 28, 2005
